DAVID HARDIE SEED CO. DALLAS, TEXAS.

O OUR FRIENDS AND PATRONS:

In handing you our catalogue for 1902 we have again to thank you for the very liberal and increased patronage of the past year, which was far beyond our expectations. We would especially thank those who induced their friends to try our seeds, and feel sure they found their confidence was not misplaced.

The past season has been a very disastrous one to crops in many parts of the United States, resulting in a shortage all round, the like of which has not been experienced in this decade. We have had to use extraordinary care in the selecting of our seeds, so as to get stocks that are well matured, and having good vitality.

Our long experience in this southern country enables us to select seeds suitable to our soils and climate, and as in the past, good quality is our first object. We feel confident that our stock of seed for quality cannot be beaten in the United States.

It has been our observation that great distress and disappointment have been caused by cheap seeds, as, in the majority of cases, cheapness means poorly grown or old seeds. Our seeds are all fresh, and, to the best of our knowledge, strictly true to name, and we can assure you that any orders you may entrust to us will be filled with the object of keeping your patronage as long as you continue to plant seeds. Hoping to be favored with an order, we are,

Respectfully yours,

DAVID HARDIE SEED CO.

We would esteem it a favor if our customers would notify us when there is a change in their address, in giving new addresses state from where moved.

HOW TO REMIT, ETC.

With every catalogue we always send an Order Sheet and addressed envelope, these will be found convenient when ordering.

Name and Address—We earnestly request our correspondents to be particular and give their full name, Post Office and State, distinctly written each time they address us; overlooking any of these essential items in an address may be the cause of vexatious delay.

Cash should always accompany the order—Money may be sent at our risk in the following manner: Post Office Order, Draft on New York, Express Company Money Order or by Registered Letter. Small amounts may be sent in two cent postage stamps.

Goods C. O. D.—No goods will be sent by us C. O. D. unless one quarter the amount accompanies the order.

In comparing our mail prices, especially on heavy seeds, such as peas, beans and corn, by the quart and pint, and other seed by the pound and quarter pound,

you must bear in mind that we pay the postage.

Warranty—We send out only seeds that will, to the best of our belief, give entire satisfaction; immunity from error being however unattainable and success always so largely dependent on outside influences, it must be expressly understood that we give no warranty, expressed or implied, and we will not be held in any way responsible for the crop. If the purchaser does not accept these seeds on these conditions, they must be returned at once, and any money paid us for them will be refunded.

VEGETABLE SEEDS

0 F

STANDARD MERIT.

The varieties of **Vegetable Seeds** offered by us, are limited to those, which in our opinion, are best suited to the Soils and Climate of this **Southern Country**, keeping before our patrons the good old reliable sorts, which, if not novel, can be depended on, in the end it is fine vegetables that are wanted, not so much novel varieties; however, any novelty we may come across, of proved merit, will be at once added to our list, but we refrain from offering anything of which we have no knowledge.

Our Prices include Postage on Packets, Ounces, Quarter Pounds and Pounds, Pints and Quarts of Vegetable and Flower Seeds. If the purchaser desires to pay his own express or freight charges, he may deduct 10 cents per pound and 15 cents per quart from the prepaid rates here offered, where so requested and the amount is mentioned at the bottom of the order, we will add extra seeds for such amounts not deducted.

Liberal Discount off All Seeds in Packets and Ounces.

Purchaser	remitting	\$1.00	may	select	Seeds	in	Packets	and	Ounces	amounting	to \$1.25
66	66	2.00	"	66	46		"		"	66	2.50
66	66	3.00	66	66	6.6		"		66	"	3.75
66	66	4 00	66	66	66		"		66	"	5.00
66	44	5 00	66	66	. 6		"		66	66	6.25

We wish it distinctly understood that the discount allowed **is only** for seeds in Packets and Ounces, and **not** for seeds by weight (over one ounce) or measure.

Asparagus.

Spargel.

Asperge.

CULTURE—Sow in the fall or early spring, thinly, in shallow drills, 15 to 18 inches apart, thin out seedlings to 3 or 4 inches in rows, saving only the strongest, transplant when two years old into permanent beds, the soil of which should have been thoroughly mixed with well rotted manure.

			1/4 lb.
Conover's Colossal, a standard variety of good quality	. 5	10	25
Palmetto, a great yielder, earlier and larger than Conover's Collossal.	. 5	10	25
Barr's Mammoth, is very large and early, light color	. 5	10	25
A snaragus Poots see "Poots and Plants"			

Artichoke.

Artischoke.

Artichaut.

CULTURE—Drop the seed early in spring and transplant the following spring in hills four feet apart, setting three plants to the hill; the soil should be rich and deep.

Beans.

The crop of Beans this year is very short especially in Wax and Pole varieties, the deliveries on our contracts, on such varieties as Wardwell's Kidney Wax, being less than twenty per cent., consequently prices are high. We have, however, made them as reasonable as possible and quantities being mitted we would advise large planters to make early purchases.

Remember, our pint and quart prices include postage; if wanted by Freight or Express, at buyers expense, deduct 8 cents per pint and 15 cents per quart from price.

DWARF, OR BUSH BEANS.

D WING ON BOOM BELLEVILLE			
Buschbohnen. Haricots			
CULTURE —Drop the Beans two or three inches apart, in rows standing eitwo feet apart; cultivate only when dry, draw the soil slightly towards them.	_

kinds of soils; beans large and of fine flavor		30	50	2.25
Lazy Wife, a remarkable variety, not only for its great pro				
but also for its fine quality; the pods are produced in				
almost a handful can be grasped at once; are stringless				
also make a fine shell bean		30	50	2.50

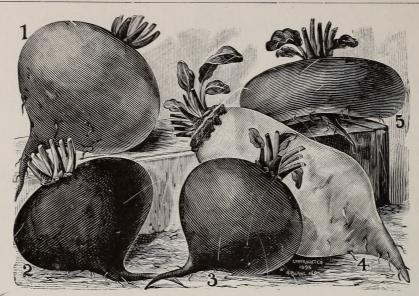

Beets.

Runkelrube. Betteraye.

Our Beet Seed has proved the purest and best the market gardeners of Dallas have ever been supplied with, many of them informed us they made extra money by having the proper kind of early beets; Southern gardeners should try our Early Eclipse and Egyptian Beet seed if they want to have the first and best in the market.

CULTURE—Sow as soon as the land will permit, and for general crop about the middle of April; sow in drills 15 inches apart and thin out to four inches; for winter use, sow the turnip rarieties about July.

Transless about July.	Pkt	07	1/4.1b.	1b
Extra Early Egyptian Blood Turnip. (Fig. 5). The well known	1	O2	-/4 110.	10.
standard early market sort, color deep red, tender and sweet; form				
similar to Flat Dutch Turnip	5	10	15	50
Dirigo or Electric. An extra early round dark red variety with smal	1			
tap root starting clear from the bulb without taper; the leaves are				
small and compact, is as early as the Extra Early Egyptian, its				
fine color, rich sweet flavor make it very desirable for the early	7			
market	5	10	25	75
Early Eclipse (Fig. 3). Very early, round rooted, dark red, very de				
sirable sort for bunching	5	10	15	50
Bassano. Early, flat, light color	5	10	15	50
Early Blood Turnip. Dark red, fine flavor and productive	. 5	10	15	50

	Pkt.	Oz.	1/4 lb.	1b.
Dewing's Blood Turnip (Fig. 2). Of fine form and flavor, grows to				
		10	15	50
a large size and keeps well				
of great regularity in shape, deep blood skin, and very dark flesh				
of best quality	5	10	15	50
Long Smooth Blood. A good late variety	5	10	15	50
Mangel Wurzel. (Stock Beets) see "Farm Seeds."				

Brussels Sprouts.

Brusseler Sproffen.

Chou de Bruxelles.

A very desirable vegetable and deserving of a more general cultivation. Culture same as Cabbage.

Brussels Sprouts....Pkt. 5, oz. 20

Cabbage.

The Cabbage Seed offered by us is choice American grown and of the very best strains; a cabbage is much dependent on the quality of the seed, cheap imported cabbage seed generally proves dear at any price.

CULTURE - All Cabbages do best in strong, well manured, and well cultivated soil. For early crop sow seeds of the early varieties in hot beds, or in a box that can be housed, anytime from middle of December to end of January, plant out end of February or beginning of March, in rows two feet apart and 18 inches between plants in row; for later cabbages sow in March and plant out April. In Southern Texas cabbage can be sown in September and planted out beginning of November. To prevent the small plants being attacked by cabbage fly, dust some tobacco powder or "Slug Shot" on them.

Early Jersey Wakefield. A very popular variety with market gardeners for early use, and is considered the best early cabbage in

Pkt. Oz. 1/4 lb. lb.

Flat Dutch.

Henderson's Early Summer.

Early Jersey Wakefield.

Variation Water and Control of the C	Pk	. Oz	. 4	lb. 1b.
Charleston or Large Wakefield is five or six days later than the				
Early Jersey Wakefield; the heads are nearly one-half larger and very solid; it is very compact in growth and does not burst open				
when ripe, like many of the early sorts	5	25	75	2.50
Earliest of All. A few days earlier than Wakefield, the heads are				
oblong, rounded at top	5	15	50	1.50
Early York. The old well known sort, the heads are small, round,				
slightly heart-shaped	5	15	35	1.35
Large Early York. Larger than above and not quite as early	5	15	35	1.35
Early Winningstadt. A fine variety for summer use; heads large				
and pointed, tender and solid	5	15	40	1.40
Henderson's Early Summer. We consider this the champion				
Early Cabbage for the South; it is the earliest large heading cab-				
bage and a great favorite with market gardeners; handsome	~	1 -	- 0	
heads, flat or slightly rounded; a good keeper	5	15	50	1.75
Danish Ball-head, a very handsome, hardy, imported cabbage; has				
proved to be one of the very best winter sorts; the heads are of good marketable size, not quite so large as Flat Dutch, but very				
hard, round and fine grained	5	20	60	2.00
Early Flat Dutch, a good all round cabbage, a sure header, and val-			00	2.00
uable for general crop	5	20	50	1.75
Early Drumhead. Heads round and flat; comes in after Hender-				
son's Early Summer	5	15	45	1.60

	Pkt	07	1/, 11	b. 1b.
Surehead. One of the finest for second early planting, growing to a	IAC	. 02.	74 11	. 10.
large size quickly and surely	5	20	60	2.25
All Seasons. Another fine cabbage, which is of the Drumhead				
strain. As the name indicates, it can be planted at all seasons				
and makes both a splendid early and late variety	5	20	60	2.00
Premium Late Flat Dutch, the standard winter variety, heads				
large, round, solid and flat on top; an excellent keeper	5	20	60	2.00
Large Late Drumhead, a very fine strain of Drumhead; short stem,				
heads large, round and thick; valuable for winter, also suitable				
for a fall crop, if sown early	5	15	40	1.50
Drumhead Savoy , an excellent winter and spring family cabbage,		10	10	1.00
partaking partially of the size of the Drumhead and the curled				
leaves of the Savoy. Market gardeners usually find it profitable				
to provide a limited quantity for discriminating customers; for				
family use it is equalled by none	5	20	50	
Mammoth Dark Red, a fine pickling cabbage, and is sometimes				
sliced in salad	5	20	60	2.00
Cabbage Plants, see "Roots and Plants."				

Carrots.

Mahren oder Gelbe Rueben.

Carrote.

Our Carrot Seed is the very best eastern grown rubbed stock, and strictly first-class. **CULTURE**—For early crops sow in spring, as soon as the ground can be worked, in drills 15 inches apart, cover seed one-half inch, thin plants to three or four inches in the row.

Earliest Red Horn or French Forcing (Fig. 1). A favorite carrot of small size, prized on account of its extreme earli-

on account of its extreme earliness and superior flavor; best for forcing. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. \$1.00.

Oxheart or Half Long Guerande.
(Fig. 5). This is one of the most valuable, either for family use or market; it is of a most beautiful shape and color. Pkt. 5c., oz. 1oc., 1/4 lb. 3oc., lb. \$1.00.

Danver's Half Long Orange.

(Fig. 6). One of the most productive; roots large but short, tapering abruptly at point, sweet and tender. Pkt. 5c., oz. 1oc., \$\frac{1}{4}\$ lb. 3oc., lb. \$1.00.

James' Scarlet Intermediate, is of a deep red color, and exceedingly delicate in flavor; root beautifully tapering and pointed, we strongly recommend this variety to market gardeners. Pkt. 5c., oz. Ioc., ½ lb. 3oc., lb. \$1.00.

Improved Long Orange (Fig. 3).

Best variety for late field culture, good for table use and suitable for stock feeding. Pkt. 5c., oz. 10c. lb. 3oc., lb. \$1.

Cauliflower.

Blumenkohl.

Chou Fleur

CULTURE-Much the same as cabbage; has to be planted very early in the South to do any

Collards.

Chon Cabn.

CULTURE-Sow seed as for cabbage in June, July or August for succession; transplant when a month old.

Celery.

Celerie.

CULTURE-Sow in March or April and rake the seed in lightly; water and shade from strong sun, set out when plants are 6 inches high, in trenches 21/2 feet apart; plants need shading during bot weather, when tall enough it should be earthed up to blanch it.

AND THE RESERVE OF THE PARTY OF	Pkt.	Oz.	¼ lb.
White Plume, a handsome, thick ribbed variety of a yellowish white color, very crisp, is easily blanched		15	5 0
Giant Pascal, easily blanched and fine keeper, large late sort, of good			
flavor	5	15	40
Golden Self Blanching, a grand variety on the style of "White Plume," except that it is golden yellow	5	20	60
Four Colony ass (Illands))			

Soup Celery, see "Herbs."

Early Garden and Sweet Corn.

Welschkorn.

Mais.

CULTURE-Plant in hills three feet apart, leave two or three plants to the hill; where ground is strong, dwarf varieties, like Adam's Extra Early can be planted in hills 21/2 feet apart.

Remember, our pint and quart prices include postage; if wanted by Freight or Express, at buyers expense, deduct 8 cents per pint and 15 cents per quart from price.

open ground	5	15	50

Early Purple Top Smooth, differs from Early Vienna only in color.... 5

Lettuce.

Salat.

Laitue.

15 50

CULTURE—Lettuce can be grown in Texas all the year round, to grow fine heads, the ground has to be good, and have plenty of moisture, for an early crop sow in frames in January or February and plant out in March, giving them space in accordance with the size of the Lettuce, for summer crop grow where sown, thinning out 6 or 8 inches apart.

Early Curled Simpson.

Green Fringed.

Philadelphia Butterhead.

./	Pkt.	Oz.	1/4 1b	. Lb.
VEarly Curled Simpson, a leading early variety, good for forcing	5	10	30	1.00
Improved Early Hanson, a curled variety, large and solid heads,				
crisp and tender	5	10	30	1.00
Black Seeded Simpson, a very desirable variety, does not produce	:			
a head, but a compact mass of leaves	5	10	30	1.00

	Pkt	Oz	1/4 1	b. lb.
Philadelphia Butter or Early Whitehead, our best large head va-		0.2.	/4	
riety, solid, well formed, tender, crisp and of good flavor; good for				
forcing as well as out of doors	5	10	30	1.00
Big Boston, a fine strain for forcing or early outdoor culture, heads				
very large	5	15	40	1.25
Boston Market, a very popular and early variety, forms a fine, solid				
head, is a profitable variety for market gardeners	5	10	30	1.00
Grand Rapids, the best of all forcing lettuce; largely grown for				
shipping, loose head, crisp, tender and fine flavor	5	15	40	1.25
Defiance Summer, unequalled for long standing, stands the summer				
heat better than any other, it forms very large, solid heads	5	10	30	1.00
St. Louis Market, is a good all round variety both for forcing and				
out of doors	5	10	30	1.00
Green Fringed. Of most ornamental growth. The rich green leaves				
are compactly arranged in a flattened form, with smooth center				
and finely fringed edges; very desirable for garnishing	5	10	30	1.00

Leek.

CULTURE—Sow same as onions, transplant into well prepared rich beds, in rows one foot apart, and four to five inches in the row, set the roots deep and draw the earth to them when cultivating, so as to blanch them.

Pkt. Oz. ¼ lb.

Musk Melon.

Zuckermelone.

Cantaloupe Melon.

CULTURE—Plant in hills five to six feet apart, dropping ten seeds to the hill, thin out to three plants to the hill, cultivate until the vines cover the ground and pinch the ends of the growing shoots to induce early fruiting.

Netted Gem or Rockyford, this has become the most popular of small melons; the fruit is oval, slightly ribbed, densely covered with coarse netting; flesh thick green, very sweet and highly flavored; our stock of this is fine, saved from choice Rockyford melons 5 10 25 75

	Pk	t. Oz.	1/4 lb.	. 1b.
Acme or Baltimore, a very popular variety, well liked on this mar-				
ket; is also a good shipper, is quite early, strongly netted, thick				
green flesh	5	10	20	60
Early Hackensack, a very valuable variety, ready for market a full				
week ahead of the old Hackensack; melons weigh from five to ten				
pounds each, very productive; green netted skin, green flesh, rich				
and sweet	5	10	20	60
Extra Early Green Citron, extremely early, cultivated largely for				
market, and for this purpose it has no superior; when ripe is pale				
yellow green, flesh green, skin roughly netted	5	10	20	60
Extra Early Cape May, a very early, large, round canteloupe, very				
productive and most profitable for market; fruit deeply ribbed and				
netted, the flesh is green, sweet, juicy and tender.	5	10	20	60
VJersey Belle, is of medium size and uniform in shape, netted and				
deeply ribbed, flesh green and of fine flavor	5	10	20	60
Early Green Nutmeg, of oval shape, roughly netted, flesh green,				
sweet, melting and highly perfumed	5	10	20	60
Montreal, nearly round and very large, skin green, ribbed and netted,				
green flesh, thick, with fine flavor	5	10	25	65
Jenny Lind, an extra early sort and one of the sweetest, fruit small				
and globular, ribbed and netted; flesh green	5	10	20	60
Cosmopolitan, a fine cantaloupe almost round in form, not ribbed, but				
well netted when ripe; flesh green, highly flavored and sweet	5	10	20	6 0
Cannonball, of Texas origin, and as its name denotes, quite round,				
is of medium size and netted, flesh green, solid and very fine				
flavored; has a very small seed cavity, and is a splendid shipper,	5	10	25	75

Water Melon.

Wassermelone. Melon d'eau.

CULTURE—The same as Musk Melon, only hills should be eight to ten feet apart according to variety.

Pkt. Oz. 1/4 lb. lb

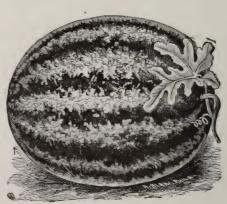

Duke Jones, this is a grand melon, grows to a very large size, eighty pounds weight being not uncommon; in shape slightly longer than Kolb's Gem; rind dark green, slightly striped, flesh bright red, juicy and delicious.....

The Dixie, a very fine melon of Southern origin, form oblong, color dark green, flesh scarlet, melting and exceedingly sweet, fine table melon, but for shipping stick to the Kolb's Gem, as it cannot be beaten for that purpose. Pkt. 5 cts., oz.

10 cts, \(\frac{1}{4} \) lb. 20 cts., lb. 60 cts.

Kolb's Gem, this is the queen of shipping melons, the rind though thin is tough, which enables it to stand handling; rind green mottled with white, flesh bright red and of excellent flavor Pkt. 5 cts., oz. 10 cts., \(\frac{1}{4} \) lb. 15 cts., lb. 50 cts.

Georgia Rattlesnake, shape oblong, bright green skin, with stripes; flesh deep scarlet solid and sweet. Pkt. 5 cts., oz. 10 cts., 4 lb. 20 cts., lb. 50 cts.

Zwiebel.

Onions.

Oignon.

Our onion seeds are the very best procurable, grown especially for us by one of the most careful growers in California. Last season the vitality and purity of those we sold, were acknowledged by our customers to be ahead of any seeds they had previously got elsewhere; onions raised from our seed took the First Premium at Texas State Fair, 1900. Large growers of onions would do well to write us before placing their orders for seed.

CULTURE—To grow fine onions, the ground should be well manured, you cannot get it too rich, they require more or less manure every crop; the land should be well plowed and pulverized before planting; for large onions from the seed, sow in drills about $2\frac{1}{2}$ feet apart, thin out to about 6 inches in the drills, and keep weeds cleared out. February is early enough to sow, you can also sow again early in the Fall for bunch onions.

Pkt. Oz. ½ lb. Lb.

Large Sugar or Hollow Crown, the only variety for the South.... 5 10 20 50

Peas.

Erbse. Pois.

Owing to adverse weather conditions the Pea crops have proved the shortest ever experienced, in some districts an absolute failure, in others the yield being less than the seed planted. The greatest shortage being in the Extra Early sorts. We would advise our customers to secure what peas they require early.

CULTURE Plant early varieties beginning of February, they are usually planted in double rows, three to four feet apart, stake those requiring it, when about six inches high; keep them clean and earth up.

Remember our pint and quart price include postage, if wanted by Freight or Express at buyer's expense, deduct 8 cents per pint and 15 cents per quart from price.

Crookneck.

Tomato.

Liebesapfel.

Tomate,

CULTURE—For early crops sow in January and February in pots or boxes, and place near a window or in spent mild hot beds, keep well watered, when plants are 3 inches high, transplant into another frame to remain until ready for planting out, this makes them strong and stocky. If you wish the first fruits that set to ripen quickly, pinch off the tops of vine and later fruit shoots; all vining varieties ought to be staked and tied up.

Our Seed is from Livingston the famous Tomato grower, and quantities of one ounce and upwards, will be supplied in packets bearing his seal.

The state of the s	Pkt	. 0	z. ¾ lb.	lb.

GRAIN AND SEED CLEANERS.

We are agents for the "Ohio Grain and Seed Cleaner." This is the machine we use in our warehouse and we consider it the best on the market. We will be glad to send catalogue to any one interested.

at 25 cents per pound.

FARM AND FIELD SEEDS.

Mangel Wurtzel or Stock Beet.

We have been much pleased to see the yearly increasing demand for mangels; they are unquestionably what are needed in our dry climate; besides being a succulent food for cattle, they tend to keep them healthy, increase the flow of milk in cows, and greatly hasten the fattening of stock for market. A yield of one thousand bushels to the acre is not unusual and we would strongly advise every farmer with stock to try an acre or two of mangels.

CULTURE—To grow well, mangels require a deep soil, plow and subsoil a foot to eighteen inches and apply plenty of rich stable manure, or 500 to 600 lbs. packing house fertilizer to the acre. Sow in drills two feet apart, thin out to 1% feet, five pounds will plant an acre.

Peanuts.

Peanuts can be planted from April to July, they yield well in this country and are a paying crop.

Small Spanish, very prolific, more solid and sweeter than the large, and easier cultivated. Prepaid, per lb. 25 cents. Not prepaid, per peck 60 cents, bushel \$2.00.

Large White, prepaid, per lb. 25 cents. Not prepaid, per peck 60 cts., per bus. \$2.00.

Sugar Cane and Forage Plants.

For those living in sections subject to drouth we connot too strongly recommend the planting of Sorghum, Kaffir Corn, etc., as they will almost certainly give them fodder the driest of seasons; all regions are at times subject to drouth, we therefore think every farmer should be on the safe side and plant some of these drouth resisting forage plants.

Seed Field Corn.

To our many customers who plant corn, we have to state, that anticipating the large demand for high-class Seed Corn in the South, we took a special trip through the different sections where the best seed corn is raised, and after carefully examining the crops we decided on corn raised in the Missouri River Valley, and secured our stock from the pick of the crop raised there; with one exception, viz: that of "Legal Tender." We have kept to the varieties which we know and have proved do well in the South. Having heard so much in favor of "Legal Tender" we decided to add it to our list and feel sure those who plant some of that variety will be highly pleased with results. As is well known, corn grown from Northern seed matures much earlier than that grown from Southern seed, in early varieties four weeks and late varieties two weeks; such being the case it stands a much better chance to be made before the very hot and dry weather such as we have in the South, strikes it. The past season demonstrated this, as in many districts in Texas the only good corn made was that grown from Northern seed. As an instance of this we know where one of our customers planted five rows of Early Mastodon in a twenty acre field of about one hundred rows, the balance being planted in corn saved from his own raising. The five rows made more corn than the balance of the field, and was entirely free from smut, while the little he had from the other was very smutty.

Our seed corn is grown by a man who has had over 15 years experience in corn growing, and is considered an expert of highest repute.

We have made our prices on Seed Corn as low as possible, and would advise making early purchases, as we believe the general scarcity of good Seed Corn, will cause the price to advance considerably, we will keep to our catalogue prices as long as there is no very material advance in the market. Prices quoted include cotton sacks. Will send by mail, postpaid, I lb. for 20c., 3 lbs. for 50c., of any of the varieties offered.

Champion White Pearl. This is a corn that has proven its merits in the South for years, giving a large and heavy yield every season. The appearance of the pure white corn is very handsome. The ears grow large and long, weighing from one to one and one-half pounds each; filling out to a remarkable degree at both ends of the cob. The cob is white and of medium size. The grain is pure white, heavy and long with the rows set close together. For a meal corn it can not be surpassed, as the grain is soft, large and pure white. The Champion White Pearl matures in 90 days, thus giving early roasting ears in the spring, and is also planted late for fall roasting ears. On account of its many good qualities the Champion White Pearl will give entire satisfaction wherever grown and for whatever purpose. We highly recommend it for a general crop of white corn, as it has been tried year after year, under all conditions and given satisfaction. Price, 50 cts. peck; 90c ½ bushel; \$1.75 bushel; \$3.40 2 bushels; \$8.00 for 5 bushels.

lowa Silvermine. A white corn which has proved a success in Texas; the grain is large, long and broad, soft and pure white, thus combining as many good qualities as any white dent corn grown; stalks grow to a height of 8 to 10 feet, according to location and soil, the ear is set about 3½ to 4 ft. from the ground and measures from 10 to 12 inches in length and about 7 inches in circumference, weight of ear 1 to 1½ lbs. This corn matures in 95 days from time of planting, thus insuring a large crop of well matured sound corn before the drought or hot winds come to cut it short. To prove our high esteem for the "lowa Silvermine" for the South, we may say we purchased more of this sort than any other yellow or white. We can confidently offer this variety to our customers. Prices, 50 cts. peck; 90 cts. ½ bushel; \$1.75 bushel; \$3.40 two bushels; \$8.00 five bushels.

Hickory King. We are sorry that we have not any of this variety to offer. Crop of it was nearly a failure and up to now we have not been able to secure any.

Early Mastodon, as denoted by the name, is an early maturing yellow corn. The color is different from the common yellow corns as it combines the shades of white and yellow, the yellow shade predominating. The ears are large and heavy, filling out well to the tip of the cob and at the butt end. The grain is long, not extra large, but closely packed on the cob, insuring a large percentage of shelled corn to the bushel. The appearance of the shelled corn is very striking and will please the most exacting customer. The stalk grows strong and quick, thus filling out the ears to a remarkable degree. Every seedsman gives the Mastodon either first or a very prominent place in their catalogues, thus showing its universal popularity. We have known this corn to be planted in the South for a number of years and it has always proven entirely satisfactory. This year it came in early and made a good crop of corn where the native sorts made a complete failure. We highly recommend the Early Mastodon for a general crop. Prices, 50 cts. peck, 90 cts. ½ bushel, \$1.75 bushel, \$3.40 two bushels, \$8.00 five bushels.

Iowa Gold Mine. In this corn we have found one that combines the good qualities of all the Yellow Dent varieties. The length of the grain is one of its special features, combined with a medium sized cob makes it a heavy yielding corn. From 70 pounds of ears, 60 to 62 pounds of shelled corn may be obtained. The color of the grain throughout is a bright golden yellow. Among the different yellow varieties the lowa Gold Mine has the finest appearance both on the cob and shelled. Prices, 45 cts. peck, 85 cts. bushel, \$1.65 bushel, 3.20 two bushels, 7.50 five bushels.

White Cap Yellow Dent. We recommend this corn to those living in drouth stricken districts and to farmers who have poor, thin soil on their farms. The White Cap Yellow Dent grows with a remarkable vigor and will produce more good corn on poor soils than any variety offered in this list. Its good qualities might be stated as follows: It is sure to mature in 90 to 95 days. It husks and shells easy, and will grow more bushels on thin land than any other variety. The tip ends of the kernels are white, smooth and the insides yellow. Prices, 45 cts. peck, 85 cts. ½ bushel, \$1.65 bushel, \$3.20 two bushels, \$7.50 five bushels.

Early Leaming. This is the earliest yellow dent corn in cultivation, maturing in 90 to 95 days from planting. The most extensively grown dent corn in the Northern States on account of its uniform size and earliness in maturing a sure crop where the season is short. The grain is small and long but the rows are so close together that the ear will shell off a remarkable amount of corn. On good land the stalks grow tall, producing two good ears to each stalk. The ears are not large but are so uniform in size and producing as it does two ears to the stalk, the yield is as large as the later varieties. The ears are long, with small red cob well filled with long grains of medium size of a rich golden color. Prices, 45 cts. peck, 85 cts. ½ bushel, \$1.65 bushel, \$3.20 two bushels, \$7.50 five bushels.

Legal Tender. Our attention was called to this corn by our grower, who recommends it for the Southern States. He is a corn specialist of fifteen years experience and upon his recommendation we can safely recommend it to our customers. The Legal Tender, at the Great Trans-Mississippi Exposition at Omaha, took the premium In competition with hundreds of other varieties exhibited from Iowa, Nebraska, Illinois and other great corn-growing states. The corn exhibit at Omaha was the greatest the world has ever seen, and that the Legal Tender should have carried off the honors is of itself the

highest praise that could be given it. It is very produceive, 75 to 100 bushels to the acre in the Missouri Valley being a common yield. It is of uniform, pure yellow color, ear large and long with deep grain on a small cob. The stalk does not grow too large, usually 9 to 10 feet, the ears being set about 4 to $4\frac{1}{2}$ feet from the ground. It matures in from 110 to 115 days and is well adapted to both light and heavy land. Prices, 45 cts. peck, 85 cts. $\frac{1}{2}$ bushel, \$1.65 bushel, \$3.20 two bushels, \$7 50 five bushels.

Mexican June Corn, this is purely a Southern corn, has been grown for years in the droughty districts in the Southwestern part of the State and in Northern Mexico. Should not be planted before June (if planted early will grow nothing but fodder), will mature if planted by 15th July. Market gardeners can plant it later for roasting ears, for which purpose it is very valuable. Prepaid, per lb. 20 cents, per 3 lbs. 50 cents. Larger quantities market price.

Pop Corn.

Monarch White Rice, the best to plant for market. Prepaid, per lb. 20c., 3 lbs. 50c. Queen's Golden, pops a beautiful creamy white, fine flavor. Prepaid, per lb. 20 cts., per 3 lbs 50 cts.

Broom Corn.

Broom Corn Straw is now very scarce and high priced, therefore this would be a favorable time to plant a few acres.

Improved Evergreen, the fibre is long and fine and keeps its green color well. Prepaid, per lb. 20 cts. Market price on quantities.

Dwarf. Grows from three to four feet high with straight, smooth brush. Prepaid, per lb. 20 cts. Market prices on quantities.

Stock Peas.

Besides being an A1 feed for stock, the straw acts as a good fertilizer to the land; we consider this one of the best paying crops a farmer can raise.

Pearl, or Cat Tail. can be cut several times like Sorghum and it will keep coming, nice green feed for cows and horses. Prepaid, lb. 30 cts., larger quantities market price.

Spring Vetches or Tares, a good forage plant, does well planted in fall, ppd. lb. 25c. Dwarf Essex Rape, makes excellent feed for fattening sheep and swine; it endures cold weather and will last a long time after the ordinary pasture grasses succumb to the frost. There is no fear of bloating in case of swine, but cattle should not be allowed to eat their fill and never turn them on to the Rape when the leaves are wet; let animals have free access to salt when being pastured on this crop. Sow in September or early in October about four pounds to the acre, sow in drills wide enough apart to allow cultivation. Can also be sown broadcast with nine or ten pounds to the acre. Price, 25c. lb. Larger quantities market price.

Cotton Seed.

We have had many inquiries for improved varieties of cotton seed, causing us to diligently look for what have done well here, both as regards staple and yield. All during the past fall we have been closely connected with large cotton buying firms, all of whom tell us there is urgent demand for cotton of good staple. If interested write us and we will quote prices on varieties we have to offer.

Buckwheat.

Sown principally in Texas for bees, generally planted in May and June. **Silver Hull,** prepaid, per lb. 25 cts.; not prepaid, per peck 75 cts., bushel \$2.50. **Japanese,** prepaid, per lb. 25 cts.; not prepaid, per peck 75 cts., bushel \$2.50.

Grass and Clover Seeds.

Prices of Grass and Clover Seeds given below are subject to fluctuation of the market but the purchaser may depend on having them at the price ruling from store the date of shipment, and of the best quality, and that we will always send as much seed as the money received will pay for. Price on one pound is quoted postpaid, larger quantities by freight or express at buyer's expense.

Alfalfa Clover is the most valuable forage plant we have, particularly well adapted to Texas soil and climate, and, although a great yielder, it does not impoverish the soil, but rather improves it; it does best in deep, loamy soil, well cultivated, and we think ought to be planted by itself, as oats, barley, etc., are cut at the very hottest time, exposing the tender plant to the strong sun. Sow early in spring, or in fall, September to November if seasonable, not less than 25 lbs. of the best seed to acre. Highest Grade Seed (the finest to be had) 25 cts. per lb., \$11.00 per 100 lbs.; cheaper grades \$9.00 to \$10.00 per 100 lbs.

- **Crimson Clover,** an annual variety, grows about two feet high, is an immense yielder, and after cutting immediately commences to grow again; sow 15 lbs. to acre. 25 cts. per lb., \$12.00 per 100 lbs.
- Alsike or Swedish Clover, hardy and stands dry weather; sow 8 to 10 lbs. per acre. 35 cts. per lb., \$2.00 per 10 lbs.
- White Dutch Clover, an excellent clover for pasture, also good for lawns; flowers very sweet, 40 cts. per lb., \$2.00 per 10 lbs.
- California Burr Clover. A winter growing variety furnishing pasturage from January to March. Is an annual, but reseeds itself upon the land. Sow on the surface of the ground in August or September about 25 pounds of Burrs to the acre. Stop pasturing about April 1st so that the seed may mature. The land may be planted in corn or cotton, by leaving one foot unbroken between the rows, on which seed enough will mature, middles can be broken out after clover dies down. 25 cts. per lb., 10 lbs. \$1.20.
- Red Clover, sow in winter in the South, 8 to 10 lbs. to acre. 30c. per lb., \$1.80 per 10 lbs.
- **Bokhara or Melilotus**, sow early in spring, 8 to 10 lbs. to acre. 40 cts. per lb., \$2.50 per 10 lbs.
- **Japan Clover**, a low spreading variety, will stand excessive drouth; sow 15 lbs. to acre 40 cts. per lb., \$2.50 per 10 lbs.
- **Bermuda Grass**, the most suitable grass for the South, is very valuable for its drouth resisting properties, and for a summer pasture it should be planted everywhere; it also makes a beautiful lawn, and is good to sow on embankments, as it binds the soil together with its shoots and roots. Sow when the ground gets warm, March to May or in early fall; 4 to 5 lbs. to acre. Price prepaid, 90 cts. per lb., \$7.50 for 10 lbs. not prepaid.
- **Mesquite or Velvet Grass.** A fine grass for Texas, makes splendid pasture, having good fattening qualities; also makes a good lawn grass as it grows close and does not run like Bermuda, Sow 25 pounds to acre. 25 cts. lb., 10 lbs. \$1.25, 100 lbs. \$11.00.
- Meadow Fescue, True English Blue Grass, is a fine pasture grass, will grow in the shade under trees, it succeeds best on moist soil, sow in spring or fall 30 lbs. to the acre. 30 cts. per lb., \$1.50 per 10 lbs., \$12.00 per 100 lbs.
- **Kentucky Blue Grass,** well known pasture grass, and combined with white clover makes a good close lawn grass, for which purpose sow 50 lbs. to the acre, for pastures 25 lbs. is sufficient. 30 cts. per lb., \$1.50 per 10 lbs., \$12.00 per 100 lbs.
- **Orchard Grass**, well adapted for sowing under trees; makes good hay and grazing; sow 25 lbs. to the acre. 30 cts. per lb., \$1.75 per 10 lbs., \$15.00 per 100 lbs.
- **Red Top**, a good grass for moist soils. 30 cts. per lb., \$1.50 per 10 lbs., \$12 per 100 lbs. **Timothy**, the finest grass for hay, sow 12 lbs. to acre. 25 cts. per lb., \$1.00 per 10 lbs., \$9.00 per 100 lbs.
- **Colorado Grass**, a Western Texas grass, seeds itself like crab grass; makes fine hay and good grazing, sow 25 lbs. per acre. 25 cts. per lb., \$1.25 per 10 lbs., \$10 per 100 lbs.
- **Rescue Grass**, comes to the rescue when other forage fails; makes splendid winter pasture; sow 30 lbs. per acre. 30 cts. per lb., \$1.60 per 10 lbs.
- **Mixed Lawn Grass**, a very fine mixture of grasses and white clover, does not run like Bermuda grass; sow 30 lbs. per acre. 30 cts. per lb., \$2.00 per 10 lbs.
- **Hungarian Awnless Brome Grass.** This closely resembles Rescue Grass, but is much more leafy, finer stalked and more erect. It grows quick and strong, providing splendid pasturage or hay. It grows again quickly after being mown. We consider it the ideal grass for hot dry regions and thin soils. It takes 35 pounds to the acre. 30 cts. lb., 10 lbs. \$1.80.
- For Other Varieties, write us for prices, etc.

Guarantee the strongest of any.

If after using any of the above and having followed directions for use, you are dissatisfied, write a letter to the **Security Stock Food Co.**, Minneapolis, Minn., stating your case and sending wrapper, and they will refund you your money. This guarantee is given on every packet.

COMPRESSED AIR SPRAYERS.

For spraying trees, vines and shrubs; washing wagons; exterminating insects; white-washing hen houses, barns and cellars; cleaning windows; applying Paris green to potatoes; sprinkling lawns; watering plants; spraying vegetables and small fruits; for keeping flies from stock and for all greenhouse and nursery work.

As a fire extinguisher it is the cheapest fire insurance. With each machine is furnished a receipt for a chemical solution, the same as used by regular chemical engines. These sprayers have been tested under a much greater pressure than is required for spraying purposes. Each sprayer is fitted with one length of hose and a nozzle for throwing solid stream and fine and coarse spray. A boy can do as much work with these self-operating sprayers as can be accomplished by six men with the old style sprayers.

The "New Century." Capacity four to five gallons; this sprayer will throw a solid stream 40 to 50 feet and fine and coarse spray 6 to 15 feet. Galvanized steel sprayer with hose and nozzle complete, \$5.00. Copper bodies with above attachments, \$6.50

CAHOON BROADCAST SEED SOWER.

Sows wheat, oats, barley, rye, buckwheat, rice, hemp and all other grains and grass seed, five times faster than by hand does its work perfectly, with one-third less seed than by any other method. Four to eight acres can be easily covered per hour, Sows wheat over a tract forty feet wide, other seeds in proportion to weight.

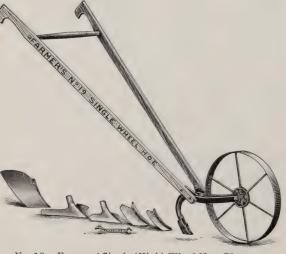

Machine is simple, strong, durable, efficient, and when used according to directions, and with proper care, is guaranteed to perform its work with perfect satisfaction.

Take no substitute. Insist on having the genuine CAHOON. At every Mechanics' and County Fair where exhibited the CAHOON has always taken highest honors, and in two years took first premium at twenty-one state fairs. This machine has just been awarded SILVER MEDAL AND DIPLOMA at the National Export Exposition—the highest prize awarded any exhibit.

Purchasers remitting \$1.00 may select Flower Seeds in packets amounting to \$1.25; and same proportion on larger amounts. All flower seeds sent mail paid.

CULTURE—A common error in planting flower seeds is covering them too deep, they should not be covered more than twice the thickness of the seed, small seeds, such as Portulaca, need only be pressed down with a board or the hand; always press the soil down firmly

of the soil. Flower seeds generally succeed best in rich, loamy soil. Height Price Inch Pkt. Oz. 5 25 40 Althea Rosea, see Hollyhock.
